Dot Product in Numpy

Live on screen Demo

Speakers

Creative team members

[Jacob Zatorski](#)

[Sarah Collins](#)

Equipment

Office studio

2 cameras

mic lights

computer with jupyter notebook on it

Script points

- The speaker introduces what we are going to be doing.
- Explains that we already know what jupyter notebooks are (referencing that this is not the first video of the course)
- Pip installs the numpy library
- Creates two arrays
- Performs the dot product on them
- Summary

The video should be very brief and it's purpose is just to demonstrate a style of video
A jupyter notebook will be provided to reproduce in the video
